

Itraconazole (Sporanox®)

Drs. Foster & Smith Educational Staff

Itraconazole is an antifungal medication used for the treatment of serious fungal infections, such as blastomycosis, histoplasmosis, aspergillosis, and cryptococcosis in dogs, cats, and other pets. It may also be used against some yeast and dermatophyte (ringworm) infections. It generally has fewer side effects than other antifungal medications, but it is very expensive. Contact your veterinarian if your pet experiences lack of appetite, vomiting, diarrhea, weight loss, depression, liver toxicity (jaundice - yellowing of the gums, skin, or eyes), or bleeding problems while being treated with itraconazole.

Keep this and all other medications out of the reach of children and pets.

If you think your pet has been poisoned...

Contact your veterinarian or one of the Animal Poison Hotlines (listed below) if you think your pet may have accidentally received or been given an overdose of the medication.

**ASPCA National Animal Poison Control Center

1-888-4ANI-HELP (1-888-426-4435). \$65.00 per case, billed to caller's credit card.

Follow-up calls can be made for no additional charge by dialing 888-299-2973.

There is no charge when the call involves a product covered by the Animal Product Safety Service.

**Pet Poison Helpline - 24-hour service available throughout North America for pet owners and veterinary professionals who require assistance with treating a potentially poisoned pet.

1-800-213-6680 (\$35.00 per incident). Staffed 24-hours a day.
