

Potassium Oral Supplements (Tumil-K[®], RenaKare[™])

Drs. Foster & Smith Educational Staff

Potassium oral supplements are used to treat potassium deficiency (hypokalemia), often occurring as a result of kidney disease. Contact your veterinarian if your pet experiences muscle weakness, abnormal heart rhythms or rates, a weak pulse, vomiting, or diarrhea while being treated with potassium supplements. Do NOT use oral potassium chloride (lite salt) as a potassium supplement.

Keep this and all other medications out of the reach of children and pets.

If you think your pet has been poisoned...

Contact your veterinarian or one of the Animal Poison Hotlines (listed below) if you think your pet may have accidentally received or been given an overdose of the medication.

**ASPCA Animal Poison Control Center - 24-hour service available throughout North America.

www.aspca.org/poison

1-888-4ANI-HELP (1-888-426-4435). \$65.00 per case, billed to caller's credit card.

Follow-up calls can be made for no additional charge by dialing 888-299-2973.

There is no charge when the call involves a product covered by the Animal Product Safety Service.

**Pet Poison Helpline - 24-hour service available throughout North America for pet owners and veterinary professionals who require assistance with treating a potentially poisoned pet.

1-800-213-6680 (\$59.00 per incident). Staffed 24-hours a day.
